BOILERMAKER PROFILE

[Qualified/Apprentice] Boilermaker with experience in [fabrication/maintenance/shutdown] environments, including [workshops/industrial sites/mines]. Competent in plate work, measuring and marking off, cutting and grinding, fitting and assembly, and supporting welding and QA requirements. Safety-focused, with exposure to permits, housekeeping standards, and working to drawings and job cards. Available for [shifts/shutdowns/contract/permanent] work and comfortable with physically demanding work and site rules.

KEY SKILLS

- Fabrication: marking off, measuring, cutting lists, assembly and fit-up
- Maintenance: repairs on chutes, hoppers, ducting, guards, platforms, handrails
- Steelwork: structural fabrication and installation, plate work, piping supports
- Tools: grinders, cutting equipment, magnetic drill, measuring tools (tape, square, vernier)
- Drawings: interpret basic fabrication drawings, isometrics (if applicable), job cards
- Quality: visual checks, dimensional checks, punch-list close-out support
- Safety: PPE compliance, housekeeping, basic permit awareness, hazard identification
- Teamwork: work with welders, fitters, riggers and supervisors; take instruction and report progress

TRADE STATUS, TICKETS AND COMPLIANCE

- **Trade test:** Boilermaker trade test completed [Month Year] at [Centre]
- **Red Seal:** Red Seal Boilermaker (Section 13) obtained [Month Year]
- **Welding:** [Your tickets or welding exposure]
- **Safety training:** [Working at Heights] · [Confined Space] · [Fire Watch] · [Rigging/Slinging]
- **Medical fitness:** [Date, if required for your work]
- **Driver's licence:** [Code B/C1/EC]

WORK EXPERIENCE

Boilermaker / Boilermaker Assistant (Shutdown Contract) – [Company/Contractor Name], [Site/City]
[Month Year] – [Month Year]

- Completed shutdown tasks including removal, repair and reinstatement of

[chutes/ducting/screens/guards/platform sections] under supervision and according to job cards.

- Measured, marked off and cut plate and sections; performed grinding, bevel prep and fit-up for welding.
- Assisted with alignment and installation of fabricated items; checked levels, square and bolt-up condition.
- Maintained housekeeping and followed site safety rules, toolbox talks and permit requirements.
- Worked [day/night] shifts and met deadlines by reporting progress and flagging material or tool shortages early.

Boilermaker (Workshop Fabrication) – [Engineering/Fabrication Shop Name], [City]
[Month Year] – [Month Year]

- Fabricated steel components from drawings, including [handrails, platforms, frames, hoppers, chutes], using measuring and marking techniques.
- Cut, drilled and prepared materials; assembled and tack-fitted components for welding; made sure joints and dimensions matched drawings.
- Used measuring tools to confirm dimensions; corrected misalignment before welding to reduce rework.
- Supported loading and dispatch by securing items and protecting finished surfaces where required.

Apprentice Boilermaker – [Employer/Training Organisation], [City]
[Month Year] – [Month Year]

- Completed practical training in plate work, fabrication fundamentals, maintenance basics and safe tool use.
- Practised marking off, cutting, grinding and fit-up; learned to read drawings and work to tolerances.
- Took part in safety routines including PPE checks, hazard reporting and keeping a clean workstation.

EDUCATION

Boilermaker Trade Test / Qualification – [Institution], [Year]

N2/N3 – [Subjects], [College], [Year]

National Senior Certificate (Matric) – [School], [Year]

PROJECTS

- **Fabrication project:** Built a [hopper/chute/handrail/platform] from drawings. Responsible for measuring, marking off, cutting, fit-up and final dimensional checks.
- **Maintenance repair:** Repaired [damaged chute/guarding/ducting] by removing worn sections, preparing plate, fit-up for welding, and assisting with reinstallation and bolt-up.
